ARCADIA **ALERT** WATCH, the Personal Safety Watch

ALERT WATCH D002

When you are concerned about your personal safety, you are concerned about being alone when something happens. In an emergency you don't have the time to get your mobile phone, unlock it and dial a number.

With the Arcadia ALERT watch, you can quickly activate an alarm and send out an **SOS** with your location to colleagues or professional teams. That's why the Arcadia ALERT watch is the best safety device when every second counts.

What is the Arcadia **ALERT** watch?

With the Arcadia ALERT watch you can send an SOS alarm to your colleagues and intervention teams, when you are in danger. They can see your location and can coordinate their response quickly.

With the Arcadia app, you can invite your security team to receive your alarm. These people will be your **Guardians**.

Your security is improved in the following ways :

1 – In case of an emergency you have no time to use your mobile phone. The simplicity of alarm activation with the Arcadia SOS watches significantly increases the opportunity to send out an SOS when every second counts.

2 – With a simple push of the button on the Arcadia SOS watch your Guardians are notified where you are and that you need help. Because they are on your team as your guardians you can be confident that they will respond. We advise you to invite as many Guardians as you can. More Guardians equals more safety.
